

Hypersensitivity to the waves produced by mobile phones becomes a new cause of permanent disability

Spain, September 2011

This has been ruled by the Labour Court to declare Madrid 24 permanent incapacitation of a college professor who suffered from chronic fatigue and environmental and electromagnetic hypersensitivity.

The ruling is unique in this regard and make a precedent for future conditions related to hypersensitivity to these waves. The verdict was issued on 23 May and gave the teachers 100% of his base salary, which amounted to 1640.80 euros.

Team Assessment of the Social Security disability (EVI), recognized in clinical diagnosis: chronic fatigue syndrome, celiac disease, fibromyalgia syndrome and environmental electromagnetic hypersensitivity, yet they dismissed the patient's disability.
