À Valence, le 05 NOV. 2009

Monsieur le Président,

[translation]

Your letter of 29 June 2009 addressed to the members of the General Council of the Département of the Drôme on the subject of the dangers of exposure to electromagnetic radiation has received my full attention.

Considering the developments in technology and in economic matters that have taken place since the original decision to install broadband in the département, or that are imminent, and in view of the fears expressed by some members of the public concerning the effects of intense radio waves, the committee responsible for the project has decided to modify its strategy for providing this service for those areas not yet covered. As a result no new wi-fi or wi-max antennas will be used to provide this coverage.

As I am keenly aware of the need to keep in mind the potential health issues linked to radiation, I give my full backing to this decision, which bears out the wish of the General Council to limit the sources of intense radio wave emission.

With my best regards,

Par délégation du Président
Le Directeur Général
des Services Départementaux
Joël CREMILLIEUX

Didier GUILLAUME
President of the General Council
Senator
