---

# NATIONAL ASSEMBLY

Constitution of 4<sup>th</sup> October 1958  
Twelfth Legislature

## PROPOSED LAW

**From which aim is to guaranty the territory coverage  
by mobile radio communication services.**

Presented by

M. Patrice Martin-Lalande,

Member of Parliament

### Article 1

1. It is inserted behind the article L 35-8 of the Posts and Electronic communications Code the following article :

“L 35-9. An operator authorized to use the Hertz frequencies to establish and operate a radio electric network open to public of mobile radio communications of second generation in metropolitan France must guaranty the coverage of priority transport axis of the metropolitan France.”

“The coverage must guaranty the service continuity of mobile radio communication service along the priority transport axis, included in the urban built-up areas for railway transports and motorways and outside the built-up areas for the other route axis. The coverage must be guaranty for all users in pedestrian or passenger situation with standard reception equipment.”

“The axes of priority transportation are the national and international railways connections in the metropolitan territory, the tracks of urban railway transports, the motorways, the national roads, the department roads on which circulate in a annual average at least 2 500 vehicles per day.”

“For the motorways, for national roads, department roads on which circulate in a annual mean of at least 5 000 vehicle per day, the coverage duty must be completed at the latest June 30, 2008, for the urban roads of guided transport of persons in proper site. A decree induces the

.....

### Article 2

The following article is inserted behind article L 34-9-1 of Postal and Electronic communications Code :

**“L34-9-2. The equipment installation of the mobile radio communication network on public and private property can't be refused for a security reason linked to harmfulness of electromagnetic field induced by this equipment since the late comply with the whole radio electric and electromagnetic prescriptions prescribed by international treaties, the European community regulation and the national rules.”**
